

NSW CEIN LOCAL GOVERNMENT ENGAGEMENT WORKSHOP ATTENDEES SURVEY: 21 JUNE 2019

		RANKING 1-5					
		1	2	3	4	5	TOTAL
Q1 How worthwhile did you find today’s workshop (1 not worthwhile, 5 very worthwhile)?		0	1	4	10	16	31
		0	3	13	32	52	100
Responses (sample)							
No outcomes for local government							
Didn’t hear about case studies/pilots							
Good starting point. Now need to see outcomes							
Well run. Good process							
Great sharing of ideas							
Relief to see such a committed group of LG teams							
Good to hear such diverse perspectives							
Great networking opportunity and exposure to new ideas							
Need industry input							
Good to feel like part of a network and support system							
Encouragement of innovative thinking							
Good process. Quick and to the point							
Great collaborative approach							
Didn’t think the activities were super effective							
A bit rushed							
Q2 Was the workshop duration too short (1), just right (3), too long (5)?		1	5	24	1	0	31
		3	16	77	3		100
Q3 Were there any topics not addressed you would like covered?							
Responses (sample)							
Who will collaborate with LG?							
Why R&D is important							
Be more outcomes based							
Need similar event for State Government - to address product stewardship and legislation							
Focus on developing markets instead of assuming they will form							
More practical ideas							
This is just the start of the conversation							
Bring the community along with the CE movement							
How industry and government will be involved and how interested and receptive they are							
Role of CEIN. Where it fits into the big scheme							
Bio waste, medical waste, food packaging							
Q4 Did the event help you develop a better understanding of the Circular Economy (1 not all all, 5 very much so)?		1	4	11	7	8	31
		3	13	35	23	26	100

NSW CEIN LOCAL GOVERNMENT ENGAGEMENT WORKSHOP ATTENDEES SURVEY: 21 JUNE 2019

Q5 Did you find the Workshop facilitator effective (1 very poor, 5 very good)?

%

Responses (sample)

Well designed

Process exhausting but very effective

Good at keeping us on track

Engaging

Clear and patient

Interesting process

Everyone was really engaged

Concise

Q6 What was the highlight/biggest takeaway for you?

Responses (sample)

Networking and idea generation

Too many people focus on process rather than source of the problem

Similar voices

Possibility to be involved in something that can enable big change

Holistic approach to waste problem

Great energy and enthusiasm

There are more similarities than differences on all issues

Potential solutions I can take back to my community

Great conversations

Important there is genuine stakeholder and community engagement on the CE

Range of ideas generated in a short space of time

Q7 How would you rank CEIN's ability to assist you developing CE opportunities (1 very low, 5 very high)?

%

Q8 Would you come to another CEIN event (No 1, Yes 5)?

%

Responses (sample)

More work to be done

Please have a regional stakeholder meeting in Kempsey/Port Macquarie

If CEIN is leading this then I will continue to engage

More collaboration required

LG may not be able to influence the creation of a CE

What can the Network do for LG?

Well organised. Innovation really needed

[illegible]

NSW CEIN LOCAL GOVERNMENT ENGAGEMENT WORKSHOP ATTENDEES SURVEY: 21 JUNE 2019

This is just the beginning
Brilliant opportunity for knowledge exchange
More work to be done and more communication

Q9 Any other comments or suggestions?

Responses (sample)

Well done!

Thanks for allowing this level of engagement

Need market-ready viable solutions

Less disposable packaging for event refreshments (or an assurance it will be recycled)

The mix of people at table helped me to understand the solution

Great to see the network implemented

No single-use plastics at your events

Small group discussions were great

Full room discussions would have been good

Please be more open and share information in the open data manner

Developing ideas is one thing. Putting them into action is another

How do we take this forward to influence EPA 20 year strategy and Federal Government CE policy implementation

What tools do councils need to educate/communicate on CE?

How can CE be built into council's policies and strategies?

How do we address consumption activities as well as product processes?

How can LG planning/strategy encourage regional industrial parks based on CE principles?

[illegible]
