Our Future Economy:
Nature, Climate, Circular

10 October, 2024
9AM-1PM AEDT
Held online via Zoom

Our Future Economy: Nature Climate Circular

10 October 2024

The Australian economy is undergoing a fundamental transformation. Driven by critical environmental and economic challenges it is shifting from the old linear take, make and waste economy - to a new circular one.

The circular economy provides a powerful and positive solution to the triple planetary crises of climate change, biodiversity loss and resource depletion. It sets a path to regenerating the natural environment while also generating new jobs and industries.

The economic and environmental dividends of integrating circular economy, climate change, nature positive and regeneration agendas are enormous. Let's work together to transition our future economy with nature, climate and circularity.

Join us at ACEF24 to unpack and understand the opportunities for your organisation on the road to 2030: the first key milestone set by State and federal Governments for Australia's circular economy transition.

The possibilities of the circular economy are as diverse as the economy itself! Learn about:

1. The economic and environmental dividends of integrating circular economy, climate change, nature positive and regeneration agendas
2. Circularity delivering Net Zero and new markets
3. First Nations leadership
4. Removing risks to investment in the future circular economy
5. Priority circular economy policy reforms for business transformation
6. Circular precincts and infrastructure models
7. Metrics for regenerative systems and circular supply chains
8. Agrifood & regional development

The 3rd *Australian Circular Economy Forum* will bring together experts and leaders from government, academia, business, NGOs and investors to share knowledge and insight on participating in the new circular economy.

Australian Circular Economy Forum 2024
